

SportIdent Timing System

This event uses the SportIdent chip system to track your progress through the event and ensure you visited all checkpoints along the course.

The chips will be handed out on the morning of the event at the event centre. Please ensure you are wearing your race number when you pick up your chip.

Please wear the SI timing chip as a ring and loop the attached elastic band over your wrist to minimise the chance of losing it. If the chip is not returned, you will be charged \$150 for its replacement cost.

At the checkpoints and finish line you will see stands similar to the one shown with orange and white flags. An electronic station is also mounted to the top of the stand.

As you pass, please ensure you insert (Punch) the timing chip into the hole in the electronic station as shown and WAIT for the beep / red flash before removing. Failure to “Punch” at a checkpoint may result in you being disqualified.

At the finish, take your chip to the download area so your times can be recorded, chip returned and you can get a printout of your split times.
